

# MODEL D

2013 BART VOS

---

## DESIGN INSPIRATION

'Keep it simple': with the 'Model D', Bart Vos brought the concept of a chair back to its bare bones, using as little material as possible. The end result is a light and airy, inviting and comfortable chair, that will easily adapt to any environment, whilst still holding its own in quality and looks. Originally designed in aluminium, today's 'Model D' comes in tactile wood.

## DESIGNED BY BART VOS

Talk about design being part of your genetic makeup: his father was renowned designer Henk Vos, one of his brothers is equally renowned designer Roderick Vos. As a matter of fact, Bart Vos is preceded by no less than three generations of furniture makers. It was only a couple of years since Bart graduated from the Royal Academy of Art in The Hague, when his father asked him—aged just 24 at the time—to design the ground-breaking Maupertuus building for the Vos emporium in Groningen. Today, Bart is Vos Interieur's creative director, responsible for interior design projects in the Netherlands and abroad. And he regularly turns his hand to furniture, for various international brands, including Lintelo. His awareness of and interest in 'the real world', outside the confines of a showroom or studio, shine through in his designs: extremely beautiful yet utterly useable.

## MAINTENANCE

All LINTELOO furniture has been made with love and care. Of course, we want you to enjoy it, for as long as possible. Proper maintenance will prolong its lifespan, which is why each piece of LINTELOO furniture comes with a maintenance instruction booklet, also available for download at [linteloo.com](http://linteloo.com). Detailed information on care and cleaning, including the recommended products, can also be found at [linteloo-care.nl](http://linteloo-care.nl)

**Upholstery:** Maintenance of the upholstery obviously depends on your choice of fabric or leather. As a rule of thumb, fabric upholstery—especially when removable—is easier to clean in case of spots and spills than leather. On the other hand, leather will handle regular wear and tear better, in a sense that the odd sign of use only adds to its character.

**Cushions:** Again, the level of maintenance depends on your choice of filling. Down/feather-filled cushions require regular plumping up and airing. But you may prefer the firmer seating experience and hypoallergenic qualities that a 100% polyester filling provides.

**Legs:** The occasional wipe-down with a damp cloth is all it takes.
