

DESCRIPTION

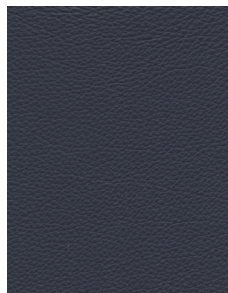

After the leather is tanned, it is finished with several layers of color pigments. The advantage of this is that small imperfections, scars and spots can be camouflaged. In addition, this top layer of color pigments protects the leather against sunlight, dirt and moisture. In practice, this is the easiest leather to maintain and most suitable for families with small children.

Nadat het leder is gelooid wordt het afgewerkt met meerdere laagjes kleurpigmenten. Het voordeel hiervan is dat kleine oneffenheden, littekens en schaafplekjes gecamoufleerd kunnen worden. Hiervan zie je dus niks meer terug op je bank of fauteuil. Bovendien beschermt deze toplaag van kleurpigmenten het leder tegen zonlicht, vuil en vocht. In de regel is dit het gemakkelijkste leder om te onderhouden en het meest geschikt voor gezinnen met kleine kinderen.
