DESIGN INSPIRATION

Lean against the trunk of an old weeping willow, and you sense that 'time' is all relative. The supple branches sway gently in the breeze and surround you, as if protecting you. This comforting feeling of 'everything is going to be alright' is what design duo Yabu Pushelberg offers you with their 'Willow' series—consisting of a modular sofa and armchair—, embracing you with its beautiful, wooden frame.

DESIGNED BY YABU PUSHELBERG

It must have been fate. When George Yabu and Glenn Pushelberg graduated from Ryerson University in Toronto, both were looking for studio space. They decided to join forces and, in 1980, Yabu Pushelberg was born. Today, the firm has evolved into a globally renowned interior architecture and design practice, earning countless accolades along the way. From its studios in Toronto and New York, Yabu Pushelberg is probably best known for their high-end residential, hospitality and retail design. A lesser known fact may be that the company not only designs interiors, but also the furniture and objects that go along with them. Their pieces excel in an amazing attention to detail, with a tailored look that transcends any trend. As George Yabu puts it: 'There is a certain kind of design that burns very bright, but the flame goes out fast. We like to think our designs have more longevity, and a broader range of uses.'

MAINTENANCE

All LINTELOO furniture has been made with love and care. Of course, we want you to enjoy it, for as long as possible. Proper maintenance will prolong its lifespan, which is why each piece of LINTELOO furniture comes with a maintenance instruction booklet, also available for download at linteloo.com Detailed information on care and cleaning, including the recommended products, can also be found at linteloo-care.nl

Upholstery: Maintenance of the upholstery obviously depends on your choice of fabric or leather. As a rule of thumb, fabric upholstery—especially when removable—is easier to clean in case of spots and spills than leather. On the other hand, leather will handle regular wear and tear better, in a sense that the odd sign of use only adds to its character.
Seating: Again, the level of maintenance depends on your choice of filling. Down/feather-filled cushions require regular plumping up and airing. But you may prefer the firmer seating experience and hypoallergenic qualities that a 100% polyester filling provides.
Frame and legs: The occasional wipe-down with a damp cloth is all it takes.
